

Magic Carpet Ride by Hamlet

(originally released November 10, 2019)

It's time for a celebration! Our invitees just need us to tell them how to get there.

Six colorful characters have helped with cluing. Each one has a quirk: a non-standard way to clue individual letters using exactly one word. Each character has contributed their quirky cluing method to three clues.

Once the grid is complete, you can travel along a sequence of cells to create a path, starting from the cell indicated by the entrance arrow above 1-Down.

- If the entry containing your current cell has a cardinal direction letter (N, E, S, or W) in it, you will proceed in that direction. Note the letter that is immediately in that direction from the direction letter.
- If the entry containing your current cell has no cardinal direction letter in it, you will proceed in the direction that the entry is written in the grid. Note the associated cardinal direction letter (S or E).

Travel along the entry in the specified direction until you reach a cell in a new entry. (At one point, you will reach a cell in *two* new entries. One will instruct you to stop; choose the other.) Let A be the number of the entry's cells along which you just traveled (including the cell you started on); place a dot above the A th letter of the associated clue. (None of these clues were touched by our helpers.)

Repeat this process until it leads you off the grid at the exit arrow and to the location of the gathering, the name of which will be revealed by the noted letters. Furthermore, the letters with dots above them, read in path order, will reveal what these dots represent: a seventh character's suggestion for how our attendees might find their way back home after the festivities.

Some clues neither involve a non-standard letter cluing nor clue an entry in the path. In the B th such clue (in clue order), circle the B th letter. These circled letters will reveal the names of two very special guests of honor.

Each helper's name, which is for you to determine, clues a letter using their preferred non-standard cluing method. For each of the affected clues, use this information to determine which helper contributed to it. Let C be the position of the first occurrence of the letter clued by that helper's name; note the character in the C th position from the *end* of the clue. These letters, when ordered properly at the bottom of this page, will reveal what we are celebrating.

THE LOCATION OF THE GATHERING:

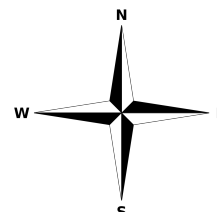

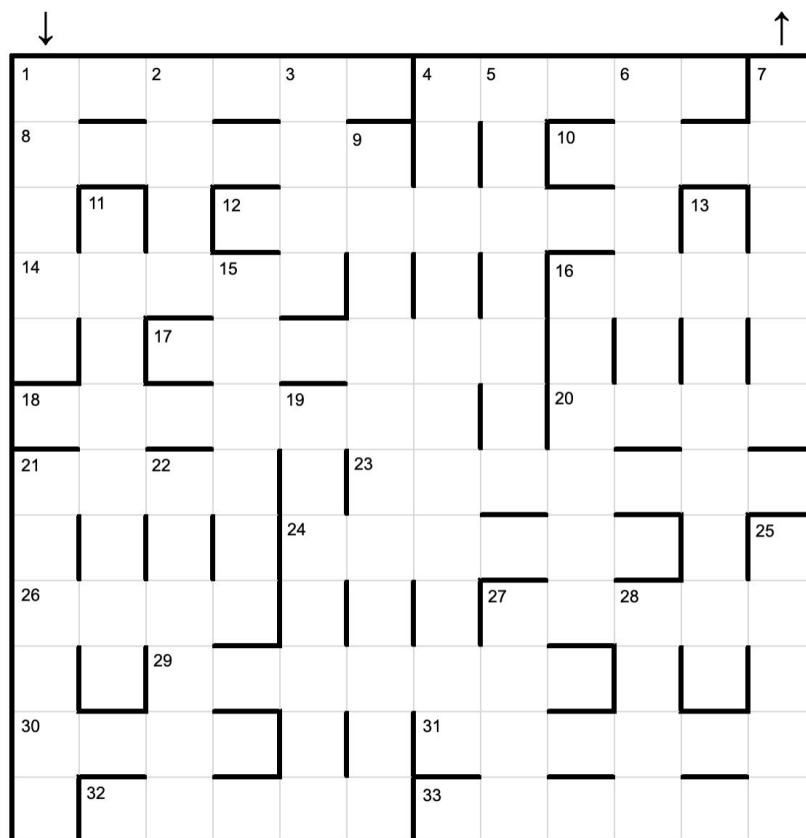

HOW OUR ATTENDEES MIGHT FIND THEIR WAY BACK HOME:
